 A-Maniraja

Summary

As a seasoned React JS Specialist, I'm acknowledged for driving advanced features that elevate user interaction. My expertise lies in React Redux development, complemented by a profound understanding of UI frameworks and front-end technologies. Proficient in shaping responsive web designs, I consistently deliver high-caliber solutions throughout the development cycle. My commitment to excellence, combined with technical finesse, defines my approach to creating impactful user experiences.

Skills

React, Redux

Javascript, Typescript

Jest, Playwright

REST, GraphQL

HTML, CSS, SASS

MaterialUI, Bootstrap, Tailwind

Express JS, Node JS, MongoDB

Next JS

Education

B.E. in Computer Science
RNS Institute of Technology, Bangalore
2015-2019

10th, 12th
Jawahar Navodaya Vidyalaya, Udupi
2013 & 2015

Experience

Mar 2022 - Current	MSys Technologies Bangalore	Senior Software Engineer
Sep 2021 - Mar 2022	Amdocs Pune	Software Developer
Jul 2019 - Sep 2021	Mindtree Chennai	Engineer

Projects

Nutanix AOS (NUTANIX) - Cloud File Storage Software

- Led front-end development for Nutanix AOS, utilizing Micro Frontend architecture leveraging React, Redux, TypeScript, Axios, Jest, and Playwright.
- Achieved robust 85% test coverage with Jest and Playwright methodologies.
- Optimized code-review workflows with Gerrit and GitHub, facilitating streamlined build and deployment through Jenkins. Proficiently managed projects using JIRA.

Business Continuity Cloud (ARCSERVE) - Product development

- Pioneered front-end development for a cloud-native cloud backup product using React, Redux-Saga, and TypeScript.
- Engineered reusable functional components with hooks, employing Axios and Redux-Saga for seamless API calls.

Engagement Center (Experience Manager) — Low Code Platform

- Led the development of a telecom vendor's Self Service Portal using the Engagement Center, transforming complex coding into a low-code solution; increased development agility by 25%.
- Executed the integration of diverse modules, championing a low-code approach, and implemented JSON data for coding efficiency. Utilized technologies such as Couchbase, Jenkins, Bitbucket, and OpenShift in the tech stack.

P&G (SKII Brain) — Data Visualization

- Architected and developed Dashboards showcasing Graphical and Chart representations of SKII product sales and user counts across different markets globally.
- Applied DOMO (SaaS Application) expertise for comprehensive data analytics and visualization. Headed project estimation and client demonstrations.

Whisper JP (P&G) — Website Renewal

- Spearheaded the revamp of the old Whisper Japan site using ReactJS SSR, implementing updated design and functionalities.
- Managed project estimation, client interactions, and demonstrations, ensuring Agile completion, and achieved a 35% increase in user engagement, along with a 20% boost in satisfaction through innovative features and improved site performance.

Bedrock (P&G) — Centralized pipelines and Next JS upgrade

- Established centralized pipelines in Azure DevOps (VSTS) for multiple websites.
- Effectively upgraded Next JS versions for enhanced performance, receiving an A-team award for excellence.

Modern Web (P&G) — DevOps

- Played a pivotal role in the development and operations of ServiceNow, addressing various requirements, and contributed to areas including Bazaarvoice, PriceSpider, and Google Analytics. Accomplished zero-defect project deployment in Production.

Matrimonial Website: ReactJS Web App with Firebase (Personal Project)

- Developed a ReactJS, Sass, Firebase-powered matrimonial website.
<https://www.kannadadevangarkulamatrimony.com/>
- Key Features: Implementing Authentication, Formik Forms, Progressive Web App.
